

## **Sidney Golub, Ph.D.**

Professor Emeritus of Microbiology and Molecular Genetics  
College of Medicine  
University of California, Irvine

Past Executive Director  
Federation of American Societies of Experimental Biology

### ***Research Interests***

Currently, my interests focus on issues of science policy and research ethics. My laboratory research program has followed two closely related themes: the *in vitro* regulation of cytotoxic cells by cell interactions and regulatory cytokines and the *in vivo* expression of cytotoxic cell function in cancer patients.
