

Eva M. McGhee, M.S., Ph.D.

Assistant Professor and Principal Investigator
Laboratory of Genomic Instability/Genetics of Complex Diseases
Department of Community Health Systems and UCSF-Comprehensive Cancer Center
University of California, San Francisco

Research Interests

My major research projects include the genomics of HIV, genomics and DNA repair of HPV and HIV-H2AX, the genomics of prostate cancer (TRAMP-transgenic mouse model), proteomics, and the genetics of diabetes. The applications and technology that the laboratory uses include microarray, array CGH, SNPs, chromosome painting, RT-PCR, protein arrays, and other molecular genetics approaches.
